

# Blogger Summary for

*a parent in silver spring*

"These are great gifts for babies to six year olds. I like how they look and feel luxe and are hand-me-downable for years, *but only cost \$24.95*. A cool classic to add to the shower repertoire."

"We received a pair of the adorable confetti moccasins for my daughter and she loves them! I know these will be perfect for her this fall and winter!"

"They seem to be very comfortable and easy to crawl in while wearing. I think their soft slim sock-like profile really adds to them being a baby and child favorite."

"After obsessing about how cute the moccasins were, I was super impressed by the quality. These moccasins are top notch quality that is sure to withstand even the craziest of toddlers! They are loved so much by our kids that they want to sleep in them."

"My daughter wears the moccasins everywhere but the bath tub, and I'm loving the idea of a flexible, non-skid sole, moccasin that stays on and allows her to toddle about our two-story home (including the stairs!) without having to worry about her losing her footing while asserting her independence."

"These moccasins? Are AWESOME. Shoes and socks in one. Quality material that is washable and comfortable. You can't go wrong ordering Nowali moccasins."

"Nowali Moccasins are the perfect solution for indoor shoes. Better than socks because babies can't take them off and with non-skid, leather soles they won't slip either. We have a "no shoes indoors" policy and so indoor shoes are a must if the weather is cool. Nowali Moccasins are machine washable and available in many adorable styles."

"My youngest daughter got a pair of Pink Block Striped moccasins. I must say they are adorable and durable. She loves to wear them. She wore them in the mud so I was a little worried on how to clean them. Not sure if it's recommended but they went in the washer and came out perfect!"

"I was impressed with the quality of these slippers for children. Normally, children's slippers are poorly constructed and can not be washed easily. The Nowalis were created to be washable and durable! They are actually hand stitched together in the traditional Swedish manner. He has fun wearing them around the house on relaxing days and I know we will really love them when Fall rolls around."

"My son literally sprints on our hardwood floors wearing his Nowali moccasins and so far (knock on wood), he has not slipped. They are also super comfortable and very easy to put on. The key, though is that they actually STAY ON Lucas' feet! Oh, and did I mention that they are MACHINE WASHABLE?! And, they come in a multitude of cute patterns and colors that kids will love! Very cute, practical, and cozy!"

"My favorite thing about these moccasins are how comfortable they seem. They are very soft and have a high quality fabric and stitching. Nowali moccasins are obviously made to last."

"At first, I thought these were just another adorable pair of footwear for my baby. I soon found out how superior Nowali moccasins are to any other socks or slippers. Not only do they come in a wide variety of great colors and patterns, but unlike others, Nowali moccasins actually STAY ON!"

"As soon as I took these out of the packaging, I handed them over to my 4 year old. She slipped them on with ease and went right back to what she was doing. I LOVE IT! She can put them on by herself. There is no tying laces or fastening straps."

"I honestly was shocked at how much my daughter liked the Nowali Moccasins. She NEVER wears slippers because she prefers socks. But with laminate flooring and a dance-obsessed 4 year old, this almost always ends in disaster. They were a hit in my home!"

"Since the day that my daughter started walking I have been nervous about her slipping on the tile and hardwood. I try to make sure she has on socks with the gripper things on the bottom- but they are always getting twisted and then she pulls them off. So, I have found the solution- Nowali moccasins. The bottom of the moccasin has a flexible, non-skid sole- exactly what she needs to make those quick stops and turns. Not only that- but they are super cute!"

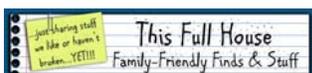

"My son loves wearing the moccasins, and I like that his little feet stay warm. He is totally enamored with them! I didn't have any problem putting the moccasins on, and he didn't kick them off either!"

"The moccasins are so comfortable in fact that my 4 year old has slept in her pair of Confetti moccasins and has tried to sneak by me and wear them out of the house!"

"They are apparently so comfortable that my daughter has worn them every day since they arrived. I even caught her trying to put shoes on over them to wear to school! In a perfect world, the Unicorn Moccasins would be available in sizes larger than 18 months. Like maybe women's size 8..."

"The one piece slipper-sock design makes them super easy for kids to learn how to put on, by themselves (YAY!) and the double elastic at the top helps to keep them on. Nowali Moccasins are very soft (because, no one likes itchy, right?) are very well made. I can't believe that they are still stitched together, by hand."
